According to our (Global Info Research) latest study, the global Dry-laid Nonwovens market size was valued at USD 6777.7 million in 2023 and is forecast to a readjusted size of USD 7893.5 million by 2030 with a CAGR of 2.2% during review period.

The nonwoven dry-laid processes starts with carding of the fibers to open and orient the fibers. A wall of air is then used to blow the fibers into a negative pressure drum, where they form a webbed matrix. The fibers are then bonded to form the non-woven textile.

The global textile chemicals market size was estimated at USD 26.16 billion in 2022 and is anticipated to grow at a compound annual growth rate (CAGR) of 4.4% from 2023 to 2029. This growth is attributable to a growing demand for apparel, technical textiles, home textiles, and others. With the growing population, the demand for clothes and other textile products is expected to increase, thus fueling the production capacities of this industry. But at present, global trade is getting more complicated due to recession in various countries, resulting in currency fluctuations. Other major challenges faced by the textile industry include the Eurozone crisis and Britain post-BREXIT.
