According to our (Global Info Research) latest study, the global Drywall & Building Plaster market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Drywall has been found to adhere to certain specific construction requirements in hotels and shopping complexes as a lightweight construction material that is also fire-resistant. Recently, hotels, restaurants, and educational institutes that seek to have a soundproof facility have looked to the drywall and building plaster market. In residential properties, drywalls are thought to be critical in simultaneously improving the aesthetic appeal and managing interior heat through thermal insulation provided by false ceilings. Drywalls have also seen increased demand because of their flexibility in dividing and creating spaces, thus enabling quick and seamless interior customization options.

Drywall has immense utility in fire resistance, sound reduction, and in increasing the life of both non-residential and residential civil structures. Drywalls are being utilized as an area separation wall to separate two building units. These factors are anticipated to boost the drywall and building plaster market over the forecast period.
