Abstracts

The global Drywall Expansion Anchor market size is expected to reach \$ 1163 million by 2032, rising at a market growth of 4.5% CAGR during the forecast period (2026-2032).

Drywall expansion anchors, the most commonly used 'invisible load-bearing points' in lightweight walls and hollow partitions, offer core value by addressing the shortcomings of traditional wood screws directly into drywall, such as insufficient pull-out strength, damaged holes after repeated disassembly and reassembly, the inability of lightweight walls to withstand hanging loads, and the highly unstable anchoring performance across different board materials and insulation layer structures. In apartment renovations, hotel rooms, office partitions, and home decoration, TV mounts, cabinet brackets, bathroom fixtures, rails, and lighting fixtures are often fixed to gypsum board only 12.5 mm thick. If relying solely on 'self-tapping screws + bare holes,' concentrated stress, moisture, or vibration can easily lead to cracking, falling, or even injury. In European projects that extensively use light steel frames and double-layer board structures, the same wall often involves multiple superimposed substrates such as cavities, insulation cotton, and metal frames, making it difficult for traditional expansion anchors to balance assembly efficiency and predictable load-bearing capacity. Drywall plugs, through expansion/locking claw/flip structures designed for gypsum board and lightweight substrates, create a larger load-bearing area and mechanical locking behind the board. This provides repeatable and calculable load-bearing capacity without damaging the board surface, giving 'hanging heavy objects on lightweight walls' an engineering-verifiable safety margin. They are also compatible with screw specifications, installation tools, and standardized testing systems (such as ETA certification), becoming a key component connecting 'decorative layer ? lightweight wall ? functional components' in interior design systems. In 2025, global sales of drywall expansion anchors across various application scenarios are approximately 43.7 billion units, with an average unit

price of approximately USD 0.018-0.026 per unit based on engineering/channel procurement, and a gross profit margin of approximately 22%-30%. Drywall plugs typically consist of a body made of engineering plastic such as nylon or polypropylene, partial metal inserts (for heavy-duty/hollow wall applications), matching self-tapping or wood screws, and retail packaging. Typical structures include cross or four-wing expansion ribs, anti-rotation features, hollow or solid plug bodies, internal threads/self-tapping guide sections, and anti-rotation designs. Some hollow wall anchors include metal flaps or metal sleeves. General parameters are: applicable board thickness 9.5-25 mm, recommended drilling diameter 6-14 mm, standard single-point allowable pull-out load 0.1-0.4 kN (for ordinary nylon plugs, single-layer board), heavy-duty hollow wall anchors can reach 0.6-1.2 kN (depending on the ETA report and installation conditions); common materials are PA6/PA6.6, PP, or zinc alloy, with a temperature resistance of -20~+80 °C, and some products have passed fire resistance/low smoke toxicity tests.

The growth of the drywall expansion anchor market is driven by two main factors. Firstly, the trend towards 'lightweight and prefabricated interior construction': the proportion of gypsum board and lightweight partitions in residential and commercial buildings in Europe and North America continues to increase, and some Asian countries are also rapidly adopting light steel frame + gypsum board systems in refined decoration and prefabricated buildings. This makes 'hanging heavy objects on non-load-bearing lightweight walls' a common requirement, thus driving the upgrade of drywall plugs from low-priced, unbranded consumables to standardized products with clear load-bearing capacities and brand endorsements. Secondly, safety and compliance factors are gradually becoming important variables driving the demand for mid-to-high-end products. In the EU, through the ETA/ETAG/EAD system and CPR (Construction Products Regulation), provides a unified framework for the performance evaluation of anchors and fasteners on concrete, masonry, and even some lightweight panels. Drywall plugs with ETA reports are increasingly specified for use in public buildings, hotels, schools, and projects sensitive to safety responsibilities, driving brands with testing and certification capabilities to gain premium pricing and market share. At the same time, the home improvement and small project channels still have a large number of low-priced, uncertified products. Price-sensitive end-users and small contractors still tend to choose the lowest-cost options, resulting in a highly fragmented and competitive mid-to-low-end market. On the raw materials side, fluctuations in nylon/PP prices, steel prices, and surface treatment chemical prices directly affect product gross margins, while the centralized procurement and private label strategies of large retailers and engineering channels further compress the bargaining power of brand manufacturers. Overall, the drywall expansion anchor market is exhibiting a dual-track pattern: 'the engineering and public building sectors are concentrating on mid-to-high-end products

driven by ETA/CE and other certifications, while the home improvement retail sector remains highly fragmented and price-competitive.' In the long term, against the backdrop of lightweight interior construction, prefabricated installations, refined decoration delivery, and increasingly stringent regulations, manufacturers with systematic solutions, comprehensive testing and certification, and brand influence are expected to continuously increase their market share in the engineering and high-end channels.

This report studies the global Drywall Expansion Anchor production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Drywall Expansion Anchor and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Drywall Expansion Anchor that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Drywall Expansion Anchor total production and demand, 2021-2032, (K Units)

Global Drywall Expansion Anchor total production value, 2021-2032, (USD Million)

Global Drywall Expansion Anchor production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (K Units), (based on production site)

Global Drywall Expansion Anchor consumption by region & country, CAGR, 2021-2032 & (K Units)

U.S. VS China: Drywall Expansion Anchor domestic production, consumption, key domestic manufacturers and share

Global Drywall Expansion Anchor production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (K Units)

Global Drywall Expansion Anchor production by Type, production, value, CAGR, 2021-2032, (USD Million) & (K Units)

Global Drywall Expansion Anchor production by Application, production, value, CAGR, 2021-2032, (USD Million) & (K Units)

This report profiles key players in the global Drywall Expansion Anchor market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include CONFAST, Simpson Strong-Tie, Toggler, Cobra, Sympafix, EZ Ancor, Hilti, Corefix, DEWALT, Fischer, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Drywall Expansion Anchor market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), volume (production, consumption) & (K Units) and average price (US\$/Unit) by manufacturer, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
