DTH Drill Rods are specialized steel pipes used in DTH drilling systems to transmit the necessary rotational force and thrust to the DTH hammer and drill bit. They connect the drilling rig to the DTH hammer, enabling efficient transfer of compressed air, which powers the hammer to break and penetrate rock formations. DTH drill rods are available in various materials, thread types, diameters, and lengths, designed to withstand the high stresses of deep drilling operations in industries like mining, construction, and geothermal exploration.
