According to our (Global Info Research) latest study, the global Dual-Actuated Circulating Valve market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Dual-Actuated Circulating Valve is used to establish a circulation channel between the inside of the coiled tubing and the annulus. When the working tool string needs to be circulated from the middle of the pipe string, the circulation hole is opened to establish a circulation channel by means of ball pressurization. Large flow, then throw the ball and cut the pin to open the circulation valve for large-volume flushing.
