According to our (Global Info Research) latest study, the global Dual Head Riveting Machine market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The double-head riveting machine is also called the opposite riveting machine. It is a combination of two-head riveting machines. When working, the workpiece is riveted from both ends at the same time. The two heads of the riveting machine are arranged opposite to each other. The axis accuracy is relatively high, and the pressure, feed speed, and feed amount of the two heads of the riveting machine are required to be consistent, so the control system is more complicated than that of ordinary riveting machines.
