According to our (Global Info Research) latest study, the global Dual-port Coaxial Connector market size was valued at US\$ 228 million in 2024 and is forecast to a readjusted size of USD 339 million by 2031 with a CAGR of 5.8% during review period.

The dual-port coaxial connector is a specially designed RF/microwave connector. Its structure integrates two independent coaxial transmission channels in the same housing, and each channel can independently transmit high-frequency signals. Its core function is to achieve space compactness and signal isolation through shared mechanical structures (such as housings and locking mechanisms). It is suitable for scenarios where multi-channel parallel transmission is required and space is limited.
