## Abstracts

According to our (Global Info Research) latest study, the global Dual Port Tester market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Dual port testers are 1G to 400G dual port test solutions for applications such as lab development and field testing, supporting existing and next generation pluggable optical modules. The ability to test two 400G ports simultaneously (including 1G, 100G, 200G, etc.) means that technicians can accomplish more in a day. The large number of ports makes fast, accurate testing critical. In addition, with dual port testing, technicians can test both primary and backup links under the same conditions, speeding up the testing process and reducing the likelihood of network failure.
