According to our (Global Info Research) latest study, the global Dual Wheel Casters market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The dual-wheel casters have a differential effect, so maneuverability is excellent. This means: Since the two wheels can also swivel in opposite directions, tandem castors can be moved more easily and have advantages over single furniture castors, making them ideal for a variety of medium to heavy lifting jobs. The double-wheel castors have a bracket made of high-quality materials such as plastic or steel, so they are very strong and at the same time do not damage the ground during use. The double-wheel castors with soft tread are especially suitable for sensitive floors such as tiles, parquet or laminate. Harder treads are better for soft ground conditions such as carpet. The double wheel castors are also available in conductive, washable and stainless steel versions for areas where hygiene regulations recommend regular cleaning and disinfection.
