Abstracts

The global Ductile Iron Pipe market size is expected to reach \$ million by 2032, rising at a market growth of %CAGR during the forecast period (2026-2032).

Ductile iron pipe is a pipe made of ductile cast iron commonly used for potable water transmission and distribution. This type of pipe is a direct development of earlier cast iron pipe, which it has superseded. The ductile iron used to manufacture the pipe is characterized by the spheroidal or nodular nature of the graphite within the iron. Typically, the pipe is manufactured using centrifugal casting in metal or resin lined moulds. Protective internal linings and external coatings are often applied to ductile iron pipes to inhibit corrosion: the standard internal lining is cement mortar and standard external coatings include bonded zinc, asphalt or water-based paint.

In the Brazilian market, the major producers are Saint-Gobain, Jindal Saw, Kubota, Electrosteel, US Pipe (Forterra), American Ccast Iron Pipe Company, Kurimoto and Mcwane, Inc. etc.

This report studies the global Ductile Iron Pipe production, demand, key manufacturers, and key regions.
