The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

A ductless spray booth is a type of spray booth that does not require ductwork to be installed in order to function. Instead, it utilizes a filtration system to remove particles and contaminants from the air before recirculating it back into the workspace. This makes it a convenient and cost-effective solution for businesses that require a spray booth but do not have the ability to install ductwork.

The upstream industry chain of ductless spray booths includes manufacturers of the various components that make up the filtration system, such as filters, fans, and motors. The downstream industry chain includes businesses that use spray booths, such as automotive repair shops, woodworking shops, and industrial manufacturers.

In terms of world market share, the ductless spray booth market is relatively small compared to other types of spray booths. However, it is growing in popularity due to its convenience and cost-effectiveness.
