Abstracts

Based on type, the market for dust control systems has been segmented into wet and dry. The wet segment accounted for a larger market share of the global dust control systems market in 2017. Wet dust control systems are further segmented into wet scrubbers and wet electrostatic precipitators. As wet electrostatic precipitators are used to treat sub-micron particulates, such as aerosols or fumes, their demand is expected to grow at a higher rate. The dry dust control systems are segmented into bag dust collectors, electrostatic dust collectors, vacuum dust collectors, modular dust collectors, and cyclone dust control systems. The electrostatic dust collectors segment is projected to grow at the highest CAGR, followed by the bag dust collectors segment.

Scope of the Report:

This report focuses on the Dust Control Systems in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.
