According to our (Global Info Research) latest study, the global Dustproof Rack market size was valued at US$ million in 2025 and is forecast to a readjusted size of US$ million by 2032 with a CAGR of %during review period.

Dustproof racks are racks that have been designed to protect against dust. They are used for protecting items in racks, such as PCs and precision equipment, from dust.

Manufacturing plants, distribution centers, and other facilities are equipped with a variety of machines, such as conveyor belts and work robots. In conjunction with this, many PCs are installed to control these machines. In most cases, these facilities generate more dust than offices and other such facilities, so it is necessary to provide dustproofing for the equipment.
