Abstracts

The global Dysphagia Soft Diet market size is expected to reach \$ 695 million by 2032, rising at a market growth of 5.7% CAGR during the forecast period (2026-2032).

A dysphagia soft diet is a specially prepared eating plan designed for people who have difficulty chewing or swallowing, aiming to reduce choking and aspiration risk while maintaining adequate nutrition and hydration. Foods are modified to softer textures—such as minced, mashed, pureed, or naturally soft forms—and liquids may be adjusted in thickness to ensure safer swallowing. The diet emphasizes consistency and ease of control in the mouth, often guided by standardized texture levels, and is commonly used in medical, long-term care, and home settings for older adults or individuals with neurological, structural, or age-related swallowing impairments. The price of this product is \$4-7/kg, Gross profit margin is between 15% and 25%.

In the Dysphagia soft diet value chain, upstream suppliers provide core ingredients (meat, fish, rice/grains, vegetables), functional inputs for texture and stability (e.g., gelling/thickening agents used within the product formulation, proteins, fats, micronutrients), and packaging materials (retort pouches, trays, cups) alongside processing equipment for cooking, homogenizing, portioning, retorting, and freezing. Midstream manufacturers formulate meals to meet defined texture levels, then produce standardized SKUs through processes such as cooking, pureeing, sieving, shaping, sterilization or freezing, and quality control to ensure consistent texture, safety, and nutrition. Downstream channels include bulk procurement by medical institutions and elderly care facilities (often via foodservice contractors), retail sales to individuals and families through supermarkets, pharmacies/drugstores, and e-commerce, and in some markets distribution through home-care service providers, with demand ultimately driven by aging populations, dysphagia management needs, caregiver workload reduction, and

institutional feeding protocols.
