Abstracts

According to statistics compiled by the CDC, almost 800,000 people are afflicted by strokes every year in the U.S. alone and nearly half of them have some sort of swallowing disorders. In addition, the National Foundation of Swallowing Disorders estimates that 22% of the American geriatric population suffers from dysphagia, making the growth potential of the North America dysphagia supplements market very high indeed. A number of studies have concluded that almost 600,000 individuals are troubled by swallowing disorders and almost 10 million U.S. patients undergo annual treatment for swallowing difficulties.

Scope of the Report:

This report studies the Dysphagia Supplements market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Dysphagia Supplements market by product type and applications/end industries.

Dysphagia can be diagnosed by flexible endoscopy, X-ray, and videofluoroscopy procedures. However, it is not always feasible to conduct these procedures on dysphagia patients. For e.g. – videofluoroscopy only observes the mouth area from the top of the chest to the pharynx. It cannot detect the esophagus abnormalities and a barium swallow exam is performed for this purpose. A lack of standardized diagnostic tests is seriously restraining the growth of the dysphagia supplements market.

The global Dysphagia Supplements market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx%

between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Dysphagia Supplements.

Europe also play important roles in global market, with market size of xx million USD in 2017 and will be xx million USD in 2023, with a CAGR of xx%.
