Abstracts

The Certification for e-bike servicing largely revolves around electric vehicles, battery systems and the related electronic systems used within these vehicles. Increasing penetration of e-bikes over conventional bicycles is driving OEMs to invest in developing the technical skills of mechanics in various servicing stations for dealing with issues related to their e-bike models. Satisfaction of e-bike customers largely depends on efficacious after-sales services. Technically certified mechanics offer specialized services to the customers and help build the brand image of the OEM which produced the product.

Scope of the Report:

This report studies the E-bike Service Certification market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the E-bike Service Certification market by product type and applications/end industries.

With the increase in sales of automobiles around the globe, there is a growing need for eco-friendly vehicles to reduce emission levels. This drives the need for vehicles such as e-bikes. Moreover, the integration of assisted pedaling system in e-bikes that aids in easy riding in uneven surfaces and the availability of e-bikes that are portable, easy to store, and convenient for riders, will also drive the demand for e-bikes.

The e-bike service certification market is fragmented due to the presence of several unregulated educational organizations offering their courses to technicians. Many training sessions are conducted to increase the network dealership of e-bikes to

multiple locations. The market is quite competitive and the players in this electric bicycle certification market mainly compete based on factors such as price, quality, and innovation.

The global E-bike Service Certification market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of E-bike Service Certification.
