Abstracts

The global E-Commerce PSD Template market size is expected to reach \$ 338 million by 2032, rising at a market growth of 5.9% CAGR during the forecast period (2026-2032).

To address the issues of inefficiency, inconsistent visual quality, and lack of professional graphic design support faced by small and medium-sized businesses designing online store pages from scratch, e-commerce PSD templates have emerged. Since the early 21st century, with the gradual maturation of e-commerce platform ecosystems and the rise of personalized store needs, the field of e-commerce visual design has developed significantly. Currently, e-commerce PSD templates have evolved into a comprehensive resource covering homepages, product detail pages, main images, promotional posters, and mobile-optimized templates. They are widely used on major e-commerce platforms such as Taobao, JD.com, and Amazon, as well as in independent website store design, significantly shortening page design cycles, unifying brand visual image, and lowering the operational threshold for merchants.

Online pre-employment skills assessment tools, as key tools for digital transformation, are experiencing a golden age of development driven by AI technology penetration, policy support, and upgraded enterprise needs. Enterprises need to enhance their competitiveness through technological innovation, brand building, and supply chain integration, seize the opportunities for high-end, intelligent, and green transformation, and upgrade from 'tool providers' to 'solution providers' to promote sustainable development of the industry.

This report studies the global E-Commerce PSD Template demand, key companies, and key regions.
