Abstracts

E-gates is a system available at the arrival and the departure-gates of the airport, which helps validate the identity of the passengers using various technologies such as iris scanning, fingerprint scanning, and face scanning.

Scope of the Report:

This report focuses on the E-Gates in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

There is an increase in strict security concerns due to the rising instances of criminal activities in airports and aircrafts across the globe. For instance, thousands of passengers were killed during the terrorist attack on World Trade Center (WTC) in September 2011. As a result, airport authorities are trying to avoid such instances in the future by heavily investing in security and installing E-gates at the airport. The increasing demand E-gates from the homeland security sector is identified as one of the key trends that will stimulate growth in the e-gates market throughout the predicted period.

The E-gates market appears to be concentrated due to the presence of a few vendors. This industry research report offers information about the competitive environment among companies in this marketplace and offers an analysis of key companies and their products. Additionally, our analysts also offer information about key areas the players currently focus on and strategies they follow to sustain the competition.

The worldwide market for E-Gates is expected to grow at a CAGR of roughly xx% over

the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
