E-glass textile yarn is a kind of light woven composite material, which is produced by tank furnace method and crucible method. Alkali free glass fiber yarn is mainly used for weaving electronic cloth, electrical insulating cloth and fishing rod cloth. These three fabrics have high requirements for cloth surface, especially electronic cloth. Users have special requirements for the uniformity of cloth thickness and quality per unit area, so they have special requirements for yarn.

Alkali-free continuous glass fiber yarn is a lightweight woven composite material, produced by the pool kiln method, and also produced by the crucible method, alkali-free glass fiber yarn is mainly used for weaving electronic cloth, electrical insulating cloth and fishing rod cloth, etc., these three fabrics have relatively high requirements for the cloth surface, especially the electronic cloth, the user has particularly high requirements for the thickness of the cloth and the uniformity of the quality per unit area, so the requirements for the yarn are also particularly high.
