This market is characterized by the presence of a number of international and regional vendors and appears to be fragmented. The international players are currently focusing on increasing their footprint in the market. As a result, the regional vendors are finding it increasingly difficult to compete with them, especially in terms of features such as quality, technology, and pricing. With an increase in product/service extensions, technological innovations, and M&As, the level of competition in the market will likely intensify in the coming years. Analysts also predict that the international players will start acquiring regional and local vendors and grow inorganically during the predicted period.

The global E-learning IT Infrastructure market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of E-learning IT Infrastructure.

Europe also play important roles in global market, with market size of xx million USD in 2017 and will be xx million USD in 2023, with a CAGR of xx%.
