Abstracts

The global E-paper Display (EPD) market size is expected to reach \$ 2348 million by 2032, rising at a market growth of 9.9% CAGR during the forecast period (2026-2032).

E-paper display also known as electronic paper or electronic ink display. They are display devices that mimic the appearance of ordinary ink on paper. Unlike conventional backlit flat panel displays that emit light, electronic paper displays reflect light like paper. This may make them more comfortable to read, and provide a wider viewing angle than most light-emitting displays. An ideal e-paper display can be read in direct sunlight without the image appearing to fade.

Global E-paper Display (EPD) key players include E Ink, LG Display, Liquavistar, Pervasive Displays, OED, etc. Global top five manufacturers hold a share over 80%. China is the largest market, with a share over 60%, followed by China Taiwan, with a share about 20 percent. In terms of product, Electrophoretic Display (EPD) is the largest segment, with a share about 90%. And in terms of application, the largest application is E-Reader, followed by Electronic Shelf Label.
