E-prescribing or electronic prescribing is a process involving the electronic generation and sending of prescription orders for the convenience of medical practitioners or physicians, allowing them to transmit prescriptions directly from the point of care to a pharmacy. E-prescribing enhances the safety of patients and the quality of care, since there is no manual writing involved and thus there is less probability of prescription errors. In addition, e-prescribing also helps conduct security checks, encapsulate medical lists, and compile the complete historical data of a patient.

Major participants in the Global Electronic Prescription System are Surescripts, Henry Schein, Cerner Corporation, HealthFusion, Allscripts, Athenahealth, Bizmatics, eClinicalWorks and Medi-Her, among others.

The Global Info Research report includes an overview of the development of the E-prescribing industry chain, the market status of Hospitals (Stand-Alone Systems, Integrated Systems), Clinic (Stand-Alone Systems, Integrated Systems), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of E-prescribing.

Regionally, the report analyzes the E-prescribing markets in key regions. North America and Europe are experiencing steady growth, driven by government initiatives and increasing consumer awareness.
