Electric scooter sharing refers to a system of short-term rental or sharing of electric scooters, allowing individuals to rent electric scooters for a specific period of time and use them to meet their own transportation needs. In electric scooter sharing systems, users typically use mobile applications to locate and unlock available electric scooters. They can then ride the e-scooter within the designated service area to their desired destination. After the ride is completed, users park the e-scooter in a designated parking area or designated location, ensuring that it does not block the sidewalk.
