## Abstracts

An electronic article surveillance (EAS) system is an anti-theft technology that prevents employee theft and shoplifting from retail stores and shops. Small security tags, which are applied to high-value merchandise, warn retailers when shoplifters try to take items through EAS antennas at exit doors. EAS systems provide good security against casual theft. Shoplifters are not familiar with these systems and their mechanisms.

Scope of the Report:

This report focuses on the EAS Antennas in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Retailers highly prefer security systems such as electronic article surveillance (EAS) antennas to prevent shoplifting and enhance their operational efficiency. It has been observed that retailers such as Walmart Stores, TESCO, Target, and Home Depot are focusing on reducing the retail shrinkage by investing heavily in EAS antennas. The installation of these systems will continue to increase during the projected period because they improve the inventory management and enhance the shopping experience for customers.

The global EAS antennas market is characterized by the presence of only a few players. Vendors are increasingly adopting mergers and acquisitions to expand their geographical presence. They are also coming up with innovative technologies to integrate RFID item-level reporting, AM detection, and traffic and video surveillance into one networked connection system.

The worldwide market for EAS Antennas is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
