Abstracts

The global ECG Telemeters market size is expected to reach \$ 867 million by 2032, rising at a market growth of 6.2% CAGR during the forecast period (2026-2032).

ECG Telemeter refers to a patient-worn medical monitoring device that continuously acquires ECG signals and wirelessly transmits them to a central monitoring station or receiver. It typically includes an ECG acquisition module, wireless communication module, battery, enclosure, user interface, lead-wire connector and basic alarm or status indication functions. In 2025, Global ECG Telemeter sales are estimated at approximately 1,250 k units, with an average ex-works price of around 450 US\$/Unit.

The ECG telemeter value chain consists of upstream ECG analog front-end chips, low-power MCUs, wireless communication modules, displays, batteries, housings, buttons, lead-wire connectors, waterproof sealing parts, ECG lead wires and electrodes; midstream manufacturers that design, register, produce and assemble patient-worn ECG telemetry transmitters with ECG acquisition, signal processing and wireless transmission functions; and downstream users including cardiology wards, emergency departments, step-down care units, general wards, post-operative recovery areas and cardiac rehabilitation centers?

The ECG telemeter market is mainly driven by hospitals' increasing need for mobile continuous ECG monitoring. Conventional bedside monitors restrict patient mobility, while patient-worn ECG telemeters collect ECG, respiration and, in some models, SpO₂ data and wirelessly transmit it to monitoring systems, allowing patients to remain monitored during ambulation, ward care, rehabilitation sessions or in-hospital transfer. In addition, the growing cardiovascular disease burden, aging populations, higher patient-safety requirements, the upgrade of general wards toward continuous

monitoring, and rising demand for ECG monitoring during cardiac rehabilitation are pushing ECG telemeters toward screen-equipped, Wi-Fi-enabled, multi-parameter, compact and long-battery-life designs.

This report studies the global ECG Telemeters production, demand, key manufacturers, and key regions.
