Abstracts

The global Echoendoscope market size is expected to reach \$ 1035.2 million by 2029, rising at a market growth of 4.7% CAGR during the forecast period (2023-2029).

Endoscopy Ultrasound (EUS) combines ultrasound technology with endoscopy to gain an internal vantage point to obtain higher resolution ultrasound images. While conventional endoscopy only provides a view of the innermost lining of the digestive tract, or its wall, the addition of ultrasound allows the physician to see beyond that wall to visualize all five layers of the GI tract as well as surrounding tissue and organs.

This report studies the global Echoendoscope production, demand, key manufacturers, and key regions.
