## Abstracts

According to our (Global Info Research) latest study, the global ECL Narrow Linewidth Laser market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

An ECL (External Cavity Laser) with a narrow linewidth refers to a type of tunable laser that is known for producing a laser beam with an exceptionally narrow spectral linewidth. ECLs achieve this by incorporating an external cavity, typically a diffraction grating or a similar optical component, to provide precise control over the laser's output wavelength. This narrow linewidth is desirable in various applications that require high spectral purity, precision, and stability.
