Eco-Solvent Printer is a digital printing device that uses eco-solvent ink for printing. Eco-solvent ink is an environmentally friendly ink between water-based ink and solvent-based ink, with low volatile organic compound (VOC) emissions and relatively small odor. Eco-solvent printers use nozzles to accurately spray eco-solvent ink onto various printing materials, enabling high-precision, high-definition image and text printing. This printer can print on a variety of non-porous materials, such as vinyl materials, flag cloth, outdoor poster materials, plastic boards, etc., and the printing effect is bright and durable, with good waterproof, sun-proof and scratch-resistant properties.
