Abstracts

The global EDA in the aerospace and defense sector has started to grow at a faster rate due to the rising demand for semiconductor chips.

Scope of the Report:

This report focuses on the EDA in Aerospace and Defense in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

CAE emerged as the largest segment in the global EDA market. It includes ESL, RTL simulation, hardware-assisted verification, analysis tool, synthesis, analog and mixed signal simulator, formal verification, design entry, logic, and formal verification.

ESL tools are expected to grow at a faster rate compared to other segments in CAE. The major reason behind this growth is the system-level approach of the tools that enables users to design, verify, and simulate simultaneously at lower costs and in less time. RTL tools enable end-users to verify logic designs using one or more RTL languages and give an abstract of the complex circuit diagram.

Aerospace and defense manufacturers have increased their adoption of EDA to reduce design time, error and cost. For instance, Bell Helicopter adopted Mentor Graphics Capital product family to streamline the wiring design process for their Bell 525 Relentless program. The company used Capital Suite, which is an advanced electrical system and wire harness design software suite. With the adoption of Capital Suite, the company was able to reduce the time taken in electrical system integration by

eliminating prototypes.

The worldwide market for EDA in Aerospace and Defense is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
