An edge grip wafer pre-aligner is a specialized wafer handling equipment designed for precise wafer alignment in semiconductor manufacturing processes. This pre-aligner employs mechanical clamps to secure the edge of the wafer and, coupled with a precise drive system and high-resolution sensors, quickly and accurately identifies wafer features such as notches or flat edges. Combining the stability of edge gripping with advanced alignment technology, it ensures that the wafer does not shift or get damaged during the calibration process. The edge grip wafer pre-aligner is compatible with various wafer sizes and types and offers positional repeat precision, making it a critical piece of equipment for enhancing wafer processing efficiency and reducing defect rates.
