## Abstracts

According to our (Global Info Research) latest study, the global Edgewise Coil market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

An edgewise coil is a type of coil that utilizes a flat, rectangular wire instead of the standard round wire. This flat wire is then wound on its edge (the shortest side) – the 'hard-to-bend' direction – to create the coil. While more complex to manufacture, they offer advantages over traditional round wire coils.
