EdTech aims to improve the accessibility, efficiency, and effectiveness of education by integrating technology into various aspects of the learning process.

Smart classrooms, also known as digital classrooms or technology-enhanced classrooms, are physical learning spaces equipped with advanced technologies to support interactive and engaging teaching and learning experiences. These classrooms typically feature digital devices such as interactive whiteboards, projectors, audio systems, and computers/laptops, along with internet connectivity. The integration of technology in smart classrooms enables teachers to deliver multimedia-rich content, collaborate with students, access online resources, and personalize instruction based on individual needs.
