Abstracts

The global Education Facilities Management Software market size is expected to reach \$ 2825 million by 2032, rising at a market growth of 7.6% CAGR during the forecast period (2026-2032).

Education Facilities Management Software is a professional digital management platform designed specifically for K-12 schools, higher education institutions, vocational schools, and educational training institutions. Based on technologies such as the Internet of Things (IoT), mobile internet, data visualization, and full asset lifecycle management, it integrates the physical facilities (such as teaching buildings, laboratories, and venues), teaching equipment (such as teaching aids, research instruments, and multimedia equipment), space resources (such as classrooms, meeting rooms, and dormitories), and operation and maintenance services (such as repair, cleaning, and energy consumption) of educational institutions. This enables standardized, visualized, and intelligent management of the entire lifecycle of educational facilities, from planning and construction to use, maintenance, and disposal. It addresses pain points such as low facility operation and maintenance efficiency, idle space resources, lack of asset supervision, and high compliance risks. It ensures the continuity of teaching activities and research work, optimizes the allocation of educational resources, reduces operating costs, and provides data support for decisions regarding facility upgrades and space planning.

K-12 schools and higher education institutions generally face challenges such as aging facilities, insufficient maintenance budgets, staff shortages, increased campus security requirements, and the increasing complexity of asset management across multiple campuses. Therefore, they have a greater need for software-based solutions to achieve closed-loop repair requests, preventative maintenance, mobile inspections, and budget

prioritization. Cloud deployment has become mainstream, with mobile work orders, QR code asset management, digital campus maps, real-time dashboards, and supplier collaboration improving response speed. AI and IoT are being used to predict equipment failures, identify high-energy-consuming areas, optimize HVAC operations, and automatically generate maintenance plans. Higher education settings focus more on space utilization, laboratory safety, energy and carbon emissions, and capital project management; K-12 settings focus more on building safety, compliance inspections, cleaning services, traffic management, and the repair experience for parents and teachers.

This report studies the global Education Facilities Management Software demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Education Facilities Management Software, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Education Facilities Management Software that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Education Facilities Management Software total market, 2021-2032, (USD Million)

Global Education Facilities Management Software total market by region & country, CAGR, 2021-2032, (USD Million)

U.S. VS China: Education Facilities Management Software total market, key domestic companies, and share, (USD Million)

Global Education Facilities Management Software revenue by player, revenue and market share 2021-2026, (USD Million)

Global Education Facilities Management Software total market by Type, CAGR, 2021-2032, (USD Million)

Global Education Facilities Management Software total market by Application, CAGR, 2021-2032, (USD Million)

This report profiles major players in the global Education Facilities Management Software market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Brightly Software, FMX, Incident IQ, AkitaBox, Facilitron, SchoolDude, AssetWorks, Planon, IBM TRIRIGA, Archibus, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the world Education Facilities Management Software market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), by player, by regions, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.

Key Questions Answered

1. How big is the global Education Facilities Management Software market?
2. What is the demand of the global Education Facilities Management Software market?
3. What is the year over year growth of the global Education Facilities Management Software market?
4. What is the total value of the global Education Facilities Management Software market?
5. Who are the Major Players in the global Education Facilities Management Software market?

6. What are the growth factors driving the market demand?
