## Abstracts

According to our (Global Info Research) latest study, the global Eductor Mixing Nozzle market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Eductor nozzles, also known as jet pumps, venturi pumps or ejectors, are the easiest way to mix, heat or pump different types of liquids, gases and solids either in-line or in-tank in the petrochemical and other industries. When comparing eductor mixing nozzles with electric pumps, they have many advantages; they are small, are low in cost, and have static parts that do not move. This prevents tearing and leaking of the nozzle. Eductor nozzles are also very easy to install and clean and do not need any lubrication.
