## Abstracts

The global EEG Headband market size is expected to reach \$ 4325 million by 2032, rising at a market growth of 12.9% CAGR during the forecast period (2026-2032).

An EEG headband is a device based on electroencephalography (EEG) technology. Through electrodes placed on the scalp, it detects the weak electrical signals generated by the activity of neurons in the brain and converts these signals into analyzable data.

An EEG headband is a wearable intelligent brain-computer interface (BCI) device that uses non-invasive EEG sensors, flexible electrodes, low-power Bluetooth, and biosignal processing algorithms. Worn on the forehead/behind the ears, it collects and analyzes brainwave signals (alpha/beta/theta/delta waves) in real time and converts them into physiological indicators such as attention, focus, relaxation, fatigue, and sleep status.

Through EEG signal analysis and AI algorithm modeling, it enables functions such as attention monitoring, neurofeedback training, fatigue warning, sleep monitoring, and emotion recognition. It is widely used in fields such as education for attention training, sleep health, mental relaxation, rehabilitation medicine, and human-computer interaction.

The key upstream hardware for EEG headbands includes electrode materials (dry electrodes/wet electrodes), biosignal acquisition chips (analog front-end AFE), sensors and microcontrollers (MCUs), batteries, and low-power modules. Core algorithms and technologies include EEG signal processing algorithms (denoising and filtering), feature extraction and classification (attention and emotion recognition), and AI models (machine learning/deep learning). Downstream applications are primarily in education, healthcare, and scientific research.

In 2025, global sales of EEG headbands reached 4.75 million units, with a production capacity of approximately 6.2 million units. The average selling price was \$375 per unit, and the average gross profit margin was 45%-55%.

This report studies the global EEG Headband production, demand, key manufacturers, and key regions.
