EFT generator is an electrical fast transient (EFT) test system that simulates EFT as part of conducted immunity testing. An EFT is an electrical transient, or disturbance, caused by a spark in the air or another gaseous discharge. Commonly, the opening of a switch through which current is flowing through triggers the transient; arcing occurs between the contacts as the switch is opened. The resulting electrical surge is referred to as an EFT and sometimes as a burst, due to its sudden, violent nature.
