According to our (Global Info Research) latest study, the global Egg White Protein Powder market size was valued at USD 221.2 million in 2023 and is forecast to a readjusted size of USD 301 million by 2030 with a CAGR of 4.5% during review period.

The egg white is responsible for 60% of the total weight of an egg. It is rich in functionally important proteins, such as ovalbumin, ovotransferrin, ovomucoid, ovomucin and lysozyme. Ovalbumin is responsible for more than 50% of the egg white protein share by weight. This protein, when separated from the egg white, can be used in the food and pharmaceutical industry. Ovotransferrin, which is the second most abundant protein in egg white, is used as a metal transporter, anticancer agent and antimicrobial agent whereas lysozyme is used as a food preservative. Ovalbumin, which is the most abundant protein, is used as a nutritional supplement by sports enthusiasts. Egg white has excellent heat stability and thus, can be used in various food products which require high heat sterilization.

Egg white protein powder is still in its research phase and there are very few companies that offer this product. The egg white protein powder has also been commercialized as egg albumin hydro lysate and hydrolyzed egg white.
