Abstracts

The growth of the market can be attributed to the increasing government initiatives supporting the use of eHealth solutions and services, high prevalence of chronic diseases, growing need to manage regulatory compliance through the use of eHealth solutions, need to curtail escalating healthcare costs, shift towards patient-centric healthcare delivery, shortage of healthcare professionals, and rising usage of big data.

SCOPE OF THE REPORT:

This report studies the eHealth market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the eHealth market by product type and applications/end industries.

The eHealth market in this report is segmented on the basis of product & service and end user. This report also provides market information on major regional segments, namely, North America, Europe, Asia Pacific, and the Rest of the World.

Based on product and service, the eHealth solutions dominated the eHealth market in 2017. The large share of the eHealth solutions market can be attributed to the growing digitization in the health continuum, increased adoption rate in emerging countries, rising government funding, ancillary government initiatives promoting the use of eHealth solutions in healthcare systems, and increasing need to curtail healthcare costs while delivering quality patient care.

By type, the EMR/EHR solutions segment accounted for the largest share of the eHealth solutions market in 2017. Supportive government initiatives for EMR implementation across the globe, growing consolidation among healthcare providers, rise in digital and connected healthcare technologies, and increased government incentives are the key factors supporting the growth of this market.
