## Abstracts

The global Elastic Film market size is expected to reach \$ 883.8 million by 2029, rising at a market growth of 4.9% CAGR during the forecast period (2023-2029).

Global 5 largest manufacturers of Elastic Film are Berry, RKW, Coveris, Fitesa and EXTEN, which make up over 35%. Among them, Berry is the leader with about 8% market share.

Europe is the largest market, with a share about 40%, followed by China and North America, with the share about 14% and 22%. In terms of product type, SBS occupies the largest share of the total market, about 34%. And in terms of application, the largest application is Absorbent Hygiene Products, followed by Medical Consumable.

Elastic film is a type of polymer film that has the ability to stretch and return to its original size and shape. This stretch ability is due to the presence of an elastic component in the film, such as elastomers, spandex, or other similar materials.

Elastic films are commonly used in a variety of applications such as hygiene products (like disposable diapers, sanitary napkins, and adult incontinence products), medical devices (such as surgical gowns and drapes, wound dressings, and medical adhesive tapes), food packaging (for products that require a tight seal and flexibility), and industrial applications (like stretch wrap films and protective packaging materials).

Elastic films provide strength, flexibility, durability, and comfort to the end-product, making them a popular choice in many industries.

This report studies the global Elastic Film production, demand, key manufacturers, and
