Abstracts

The global Elastic Rail Fastener market size is expected to reach \$ 1604 million by 2032, rising at a market growth of 1.7% CAGR during the forecast period (2026-2032).

Elastic rail fastener is used to link the rail and tie (or other types of track basis) on the track, also known as the intermediate coupling member.

It includes spikes, pads under rail and elastic fastener clips.

Fasteners should be long-term, effectively maintaining a reliable link rail and sleepers, preventing relative movement of the rail sleepers, and can give full play to its performance under dynamic shock absorption cushioning effect, delaying the accumulation of residual deformation track.

Thus it requires sufficient strength, durability and some flexibility, but also simple structure, easy installation and removal.

The Elastic Rail Fastener industry concentration is relatively high in United States. United States giant market is dominated by three companies, i.e. Pandrol, Vossloh and L.B. Foster. These three manufacturers occupies above 70% of the whole market volume, and they has more types of products.
