According to our (Global Info Research) latest study, the global Elastic Rail Fastener market size was valued at USD 1362.9 million in 2023 and is forecast to a readjusted size of USD 1525.9 million by 2030 with a CAGR of 1.6% during review period.

Elastic rail fastener is used to link the rail and tie (or other types of track basis) on the track, also known as the intermediate coupling member.

It includes spikes, pads under rail and elastic fastener clips.

Fasteners should be long-term, effectively maintaining a reliable link rail and sleepers, preventing relative movement of the rail sleepers, and can give full play to its performance under dynamic shock absorption cushioning effect, delaying the accumulation of residual deformation track.

Thus it requires sufficient strength, durability and some flexibility, but also simple structure, easy installation and removal.

The Elastic Rail Fastener industry concentration is relatively high in United States. United States giant market is dominated by three companies, i.e. Pandrol, Vossloh and L.B. Foster. These three manufacturers occupies above 70% of the whole market volume, and they has more types of products.
