Abstracts

The global Elastic Therapeutic Tape market size is expected to reach \$ 875 million by 2032, rising at a market growth of 13.3% CAGR during the forecast period (2026-2032).

Elastic therapeutic tape is an elastic cotton strip with an acrylic adhesive that is used with the intent of treating pain and disability from athletic injuries and a variety of other physical disorders. In individuals with chronic musculoskeletal pain, research suggests that elastic taping may help relieve pain, but not more than other treatment approaches, and there is no evidence that it can reduce disability in chronic pain cases. Elastic therapeutic tape has been widely used for rehabilitation and treatment of sports injuries. Tapes with different elastic properties serve different treatment purposes with inappropriate tension reducing tape effectiveness.

Global Elastic Therapeutic Tape key players include Kinesio Taping, SpiderTech, KT TAPE, RockTape, StrengthTape, etc. Global top five manufacturers hold a share about 70%. North America is the largest market, with a share about 55%, followed by Japan and Europe, both with a share about 20 percent. In terms of product, Roll Form is the largest segment, with a share about 55%. And in terms of application, the largest application is On-line Shop, followed by Pharmacy, Mall & Supermarket, etc.
