Abstracts

The global Elderly Health and Wellness Food market size is expected to reach \$ 46970 million by 2029, rising at a market growth of 3.7% CAGR during the forecast period (2023-2029).

Elderly health foods are dietary supplements and traditional tonics that are specifically formulated to support the health and well-being of older adults. As people age, their nutritional needs may change, and they may require additional nutrients to support healthy aging. Dietary supplements for the elderly may contain a variety of nutrients, such as vitamins, minerals, and antioxidants, to help support overall health and well-being. Some common ingredients in these supplements may include calcium, vitamin D, and omega-3 fatty acids to support bone health, as well as probiotics and fiber to support digestive health. Traditional tonics are also commonly used in many cultures to support the health of older adults. These tonics may contain a variety of natural ingredients, such as herbs and roots, that are believed to promote health and well-being. For example, ginseng, goji berries, and deer antler are commonly used in traditional Chinese medicine to support overall health and vitality in older adults.
