According to our (Global Info Research) latest study, the global Electric Anorectal Stapler market size was valued at US\$ 153 million in 2025 and is forecast to a readjusted size of US\$ 228 million by 2032 with a CAGR of 5.9% during review period.

The electric anorectal stapler is a electrically driven surgical instrument specifically designed for anorectal surgery. Driven by a motor, it performs tissue anastomosis and cutting. It is suitable for surgeries such as hemorrhoid mucosal circumcision and staplement, and rectal mucosal prolapse repair. It features stable and uniform firing speed, uniform anastomosis, and ease of operation, reducing the risk of tissue damage associated with manual manipulation.

The upstream industry mainly includes suppliers of core components such as motor drive modules, staples, blades, ABS plastic housings, and precision stamping parts, involving precision mechanics and electronic control technologies. The downstream industry covers anorectal surgery, general surgery, and day surgery centers in hospitals at all levels. Sales are achieved through medical device bidding and procurement, distributor distribution, and centralized procurement platforms, serving clinical scenarios such as hemorrhoid surgery and rectal prolapse repair. The global unit price of an electric anorectal stapler is US\$81.5, with annual sales of approximately 1.82 million units and a global production capacity of 2 million units. The industry profit margin is 25%.
