Electric bandfile is an electric tool used for grinding, trimming and finishing the surface of materials such as metal, wood or plastic, using a ring-shaped abrasive belt (grinding belt) as the grinding medium. Its structure is similar to a small belt sander, equipped with a narrow and replaceable abrasive belt, which can enter small or complex areas for fine grinding. It is particularly suitable for application scenarios such as weld processing, edge trimming, deburring, and mold finishing. Bandfiles are flexible to operate and highly efficient. They are portable grinding tools commonly used in precision manufacturing, automobile maintenance, metal processing and other industries.
