Electric barrel pumps are motor-driven devices powered directly from an electrical outlet or by an internal rechargeable battery to draw fluids out of a container. They generate consistent flows at a higher rate than hand drum pumps to dispense or transfer moderate to large amounts of fluid. They're also more energy efficient than pneumatic pumps. Also called an electric barrel pump or siphon pump, these electric-powered drum pumps connect to an adapter that allows the intake shaft of the pump to be mounted through the bung hole of a drum or other container.
