Electric Trailer Solutions are designed to improve transportation efficiency, reduce carbon emissions, and provide a more environmentally friendly transportation option. These solutions can be applied to many types of trailers, including cargo trailers, RVs, campers and agricultural trailers.

Electric Camping Trailer refers to a towable caravan equipped with integrated electric propulsion or electric-assist systems, including onboard motors, batteries, power electronics, and control software, that support movement and maneuvering while being towed by a primary vehicle. Rather than operating as a fully self-driven vehicle, it reduces towing load, improves stability and efficiency, and enhances low-speed handling such as parking and campsite positioning. Electric trailer caravans represent an emerging segment of the recreational vehicle market, driven by the growth of electric tow vehicles, advances in battery technology, and demand for more sustainable, user-friendly caravan travel.
