## Abstracts

An electric gripper is a tool mounted on the equipment to grip work pieces. By opening and closing the fingers powered by electric motor rather than pneumatic power, the electric gripper grips and releases work pieces.

Electric gripper and pneumatic gripper are two different types of gripper both widely used in various automation applications. Compared with pneumatic gripper, electric gripper are more cleaner grippers, need no air lines and save on power and maintenance, and electric gripper is more suitable to be used for detect grip.
