## Abstracts

The global Electric Hi-Torque Nutrunner market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Electric hi-torque nutrunner is a type of power tool used for tightening nuts and bolts. It is designed to deliver high levels of torque, which is a measure of rotational force, and is often used in industrial and manufacturing settings where large and heavy equipment is assembled. Unlike traditional wrenches or ratchets, which rely on manual force to tighten nuts and bolts, a hi-torque nutrunner uses an electric motor to rotate a socket or drive that is fitted over the nut or bolt. This allows for faster and more consistent tightening, as well as greater precision and control.

This report studies the global Electric Hi-Torque Nutrunner production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Electric Hi-Torque Nutrunner, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year.
