According to our (Global Info Research) latest study, the global Electric Multifunctional Deli Slicer market size was valued at USD 320.9 million in 2022 and is forecast to a readjusted size of USD 448 million by 2029 with a CAGR of 4.9% during review period.

Electric multifunctional deli slicer is a tool used in butcher shops and delicatessens to slice meats, sausages, cheeses and other deli products.

Booming food consumption and food blogging are expected to drive the growth of the market. Home food slicers are growing in popularity because they reduce the time it takes to cut a variety of foods compared to traditional tools such as home slicers. The growing preference for efficient kitchen tools across the residential sector is increasing the demand for home slicers. Adoption and introduction of foreign and new cuisines and growing trend of finger foods are likely to drive the demand for specialty tools. Demand for home slicers across all regions is expected to continue to grow owing to expanding affluent consumers and middle-class income groups, rising working population, and improving consumer lifestyles, which eventually lead to the adoption of these tools. Younger consumers make up the majority of the workforce, and people in western countries are more inclined to host dinner parties and backyard cooking during the festive season, which may accelerate the demand for such tools.
